July 6, 2006

Europower hose assemblies are assembled in accordance with the swaging manuals approved under the DM & Q process. Atlantic Hose and Fittings are able to assemble these high-pressure assemblies based on that process. The WI given them includes our hose and fittings and is in accordance with that process. Beginning on page 3 of the hose and Fittings catalog and ending on page 16, the DM & Q process and hose assembly process is further explained. All testing of hose assemblies is done per the customers specifications.

Thank you,

A handwritten signature in blue ink, appearing to read "George Douzos", is written over the typed name.
